

Dodge County (WI) Labor Region

The Dodge County Labor Basin includes all or portions of eight counties in Central Wisconsin. The criterion used to include a county in this labor basin is whether it contains communities from which, it can be reasonably assumed, individuals may commute to the center of the basin (The City of Mayville) for an employment opportunity. In the case of the Dodge County Labor Basin, it is reasonable that individuals may commute from (and within) the highlighted area because these counties contain 1) communities with adequate transportation to the center of the labor basin and 2) communities that are within a 45-minute commute to the center of the labor basin.*

The Dodge County Labor Basin has a total population of approximately 657,906, and a Civilian Labor Force of 384,778. The total number of employed is 370,915 and the average county unemployment rate was about 3.60% at the time of this study (Q1 2018).

The Docking Institute’s analysis suggests that the Dodge County Labor Basin contains an Available Labor Pool of 223,727 individuals.

** Portion of Dane, Fond du Lac, Washington, and Waukesha are excluded from the labor region because Madison, Fond du Lac, and Milwaukee offer many job opportunities for workers and potential workers. It is reasonable to assume, that while some workers do indeed travel from these areas to the greater City of Mayville area for work, many potential workers from those counties will find employment opportunities closer to home.*
